

TOT TURF + BROCK POWERBASE PLAY: THE ULTIMATE PLAYGROUND SAFETY SYSTEM

Tot Turf Synthetic Turf, combined with Brock PowerBase Play attenuating foam layer, delivers unmatched impact protection, drainage, and durability for playgrounds. Designed for safer play, this system ensures consistent shock absorption, stability, and long-lasting performance in all conditions.

FEATURES:

- **Superior Impact Protection** – Engineered for consistent shock absorption, reducing the risk of serious injuries and ensuring safer play.
- **Industry-Leading Drainage** – Rapid water flow prevents puddles and standing water, keeping playgrounds dry and ready for action.
- **Unmatched Stability** – Provides a firm, even foundation, preventing turf shifting and maintaining consistent playability.
- **Eco-Friendly & Sustainable** – Made from recyclable materials, promoting environmental responsibility without compromising performance.
- **Long-Lasting Performance** – Built to withstand heavy use and extreme weather, ensuring durability for years to come.
- **Certified Safety Standards** – Meets and exceeds ASTM and IPEMA impact attenuation requirements, delivering trusted safety for playgrounds.
